

5/6/74

Talked to Walter Marshall

- ① Can get a copy of report from Whiteland incldy costing (attache 2 to paper being prepared)
- ② Mr Marshall will send us a copy of proposal when it is ready (Monday/Tuesday noon (early))
He will also send it to Sam Edwards.
- ③ Marshall agrees we should contact Whiteland + Aslby
- ④ I suggested that we should ensure that Marshall will look after contacts with AERE etc about avoiding duplication.
These people will support that AERE/SRC progr. goes ahead.
- ⑤ AERE will participate in programme as basic background but will have their own applied progr.
- ⑥ AERE will have to deal with all theoretical work and pellet manufacture
- ⑦ We can be concerned with Eng. Phys. support particularly for universities.
- ⑧ Talked about buildings. [He prefers it off RL site]

5/6/76

Talked to Whiteland.

- ① He will red report
- ② His background was
 - a) Nov 73 - Jan 74 study and costing (crude) within strong boundaries set by Walter Marshall.
 - b) discussions with Bradley / Paton / Fendley
 - c) Aim is to get figures good enough to get an in principle agreement and then do a proper design study.
- ③ He said report is crude and then that we should have further talks with him when we had read it.
